

The Beatles Problem

The Beatles are running late for a gig, they only have 19 minutes to get there!

To reach the venue, they must cross a rickety bridge. It's so rickety that only two Beatles can cross at a time. It is so dark that they will also need a torch when they cross, but they only have one torch between them!

John is on-the-ball and can cross in 1 minute. Paul is a little slower and takes 2 minutes to cross. George is a bit dreamy and takes 7 minutes, and Ringo is Ringo so he takes 10 minutes to cross.

Can the Beatles get to their gig on time?
